

Stout Alumnus

Fall 1983

*Wendy Wagner '83
Miss Wisconsin*

Wendy Wagner takes the crown

The new Miss Wisconsin is a recent Stout graduate. Wendy Wagner, 22, captured the title in June during the contest held in Oshkosh.

A business administration major, Wagner was able to make special arrangements to complete her course work, enabling her to graduate in August.

Wagner will spend one year representing the state and will compete in the Miss America pageant at Atlantic City, New Jersey. (The pageant had not yet been held at press time.)

Wagner was selected from among 30 women from throughout the state. She sang the solo "Mira" from the musical "Carnival" during the talent competition.

Wagner, who was Miss Menomonie before entering the state contest, said her motivation to compete was sparked by her interest in the educational and scholarship benefits that she will accrue as the winner. She said she eventually hopes to receive a master's degree and pursue a career in business. "It is important for me to do this because today's woman must be ready for the competition in today's society," she said.

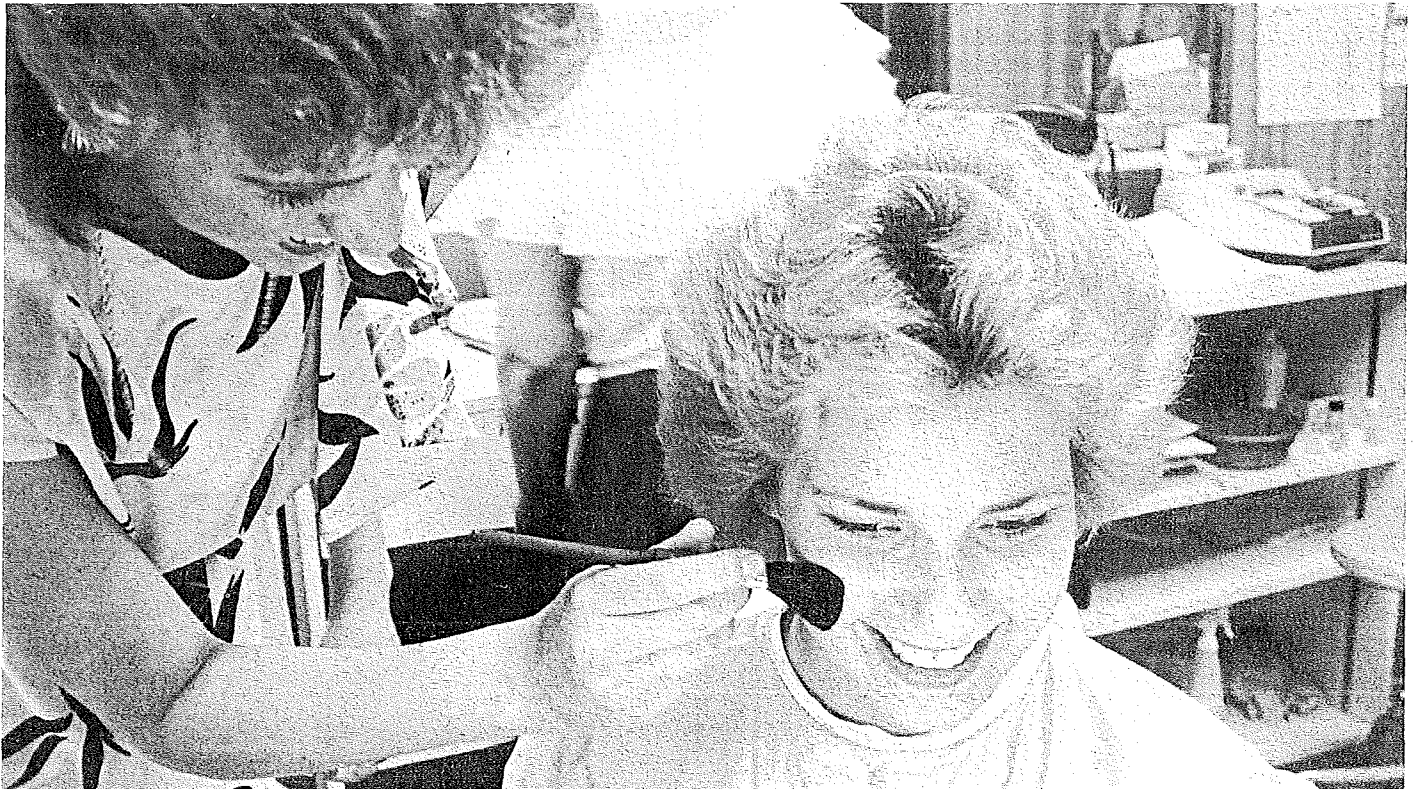

Wagner is the daughter of Mr. and Mrs. Dan Hagen of Des Plaines, Illinois. She moved to Wisconsin four years ago to attend Stout.

She said the Miss Menomonie contest was her first association with a beauty pageant and that her hopes for the state contest were only to become a finalist. She said she has similar hopes for the Miss America contest.

Wagner's interests include voice, French horn and piano. At Stout she served as manager for WVSS, the campus radio station. □

INTERNATIONAL MISSION

William Rosandick is a Stout graduate on an international mission. Rosandick, who received his bachelor's degree in Hotel and Restaurant Management in 1979, is on a 27-month tour of duty in the Philippines, where he is a Peace Corps volunteer.

An article appearing in Rosandick's hometown newspaper, the Wisconsin Rapids Daily Tribune, said that he joined the Peace Corps "because he likes to work with people and help people."

Writing for the Tribune, Rosandick said the Philippines has about 425 Peace Corps volunteers, the largest number in any country served by the Corps.

Rosandick said Philipinos are proud of their association with the United States. "When talking to people, after mentioning that you are from the United States, most people tell you a son, daughter, brother or sister lives in the 'states.' They can also tell you the city the relative lives in."

Rosandick said he is working with The Rural Health Unit, which

is part of the Philippine government's Ministry of Health. "My superior is a doctor and I also work with two nurses, seven midwives and two sanitary inspectors," he said.

Rosandick said he is encountering some "surprises" during his stay in the Philippines. "One morning I was putting on one of my boots, I couldn't fit my foot into the boot because something was inside," he writes. "As I peered in I saw a reptile face looking back at me. You never saw a boot go flying across the room so fast. After I picked up the boot and shook it, out came a 9-inch lizard. Next morning it was back in the same boot. This time I looked first. I haven't seen it since."

But despite such "surprises" Rosandick finds his Peace Corps service enlightening to him and helpful in showing "a positive side of America and Americans."

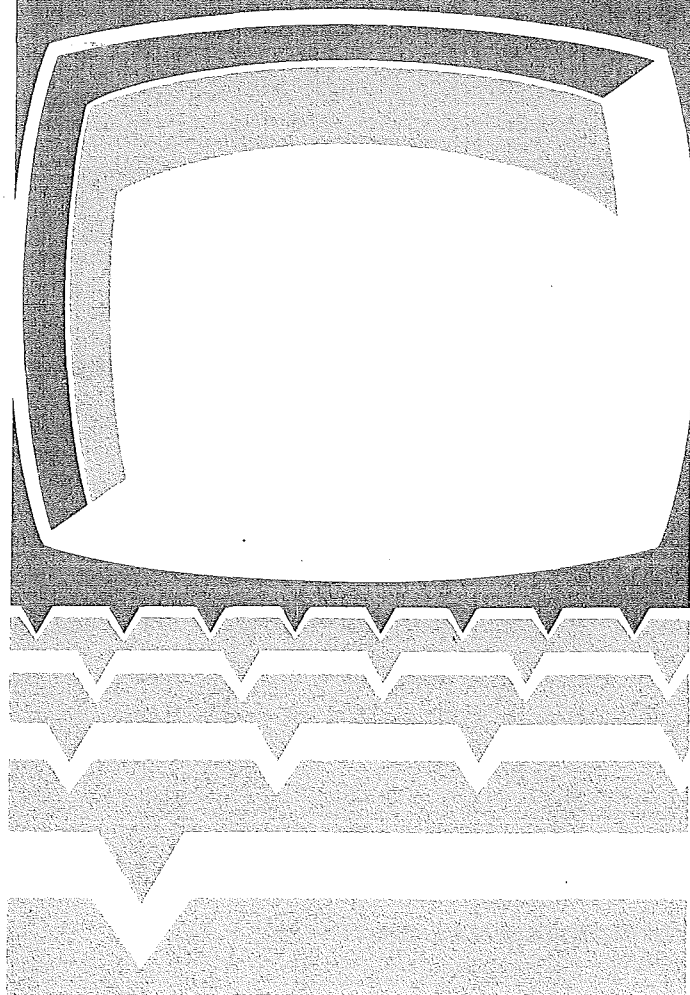

"It has been predicted by philosophers and futurists that in the years to come, with computers, the jet age, advancing technology

and guest workers traveling internationally, that individual cultures will find it difficult to survive," Rosandick writes. "Instead, they predict a 'world community', with countries adopting customs and parts of cultures borrowed from other countries." Rosandick added that people learn from other people and in doing so get rid of some of their misconceptions. "Understanding is important," he said. "There is personal satisfaction in talking to people from another culture on the same level—as a human being—and realizing that a common goal for many people is making this world a better place to live."

Rosandick said that one of his goals is to learn several Philippino regional dialects. "It is important for me to be able to converse in the local dialect because, although English is spoken by some of the children (in the area), they don't understand it in detail," he said. He said he also hopes to become involved with nurses and midwives on pre-natal care discussions with pregnant mothers. □

APPLIED MATHEMATICS

*Stout takes
a different slant*

Students majoring in applied mathematics at UW-Stout have a high job placement rate, and employers from many parts of the country come to the university in search of prospective employees.

Applied math graduates are working at jobs from California to Colorado to the East Coast at such well-known firms as McDonnell Douglas, Texas Instruments, Hughes Aircraft, and J.C. Penney.

Eino Maki, associate professor of mathematics at Stout, believes one of the major reasons for this is Stout's approach to math. "It is not a traditional program," Maki said, adding that it is something comparable to having a double major, in math and another related course, perhaps computer science or statistics.

Because of the diversity of courses offered within the major, a graduate in applied math might fit well into a variety of jobs, perhaps mechanical design, industrial management, computer-aided manufacturing, market analysis or economic forecasting, Maki said.

All math students have classes in the major's required subjects, but emphasis will vary. Some choose statistics, others computers. Students excel in different areas within the major, Maki explained.

"We are not trying to train someone just to work on a computer," Maki said, adding that the program is trying to give the foundation, the logic and problem-solving, to apply to a number of jobs. The Stout math program is a "blending" of information, Maki said, that gives students flexibility for all kinds of jobs.

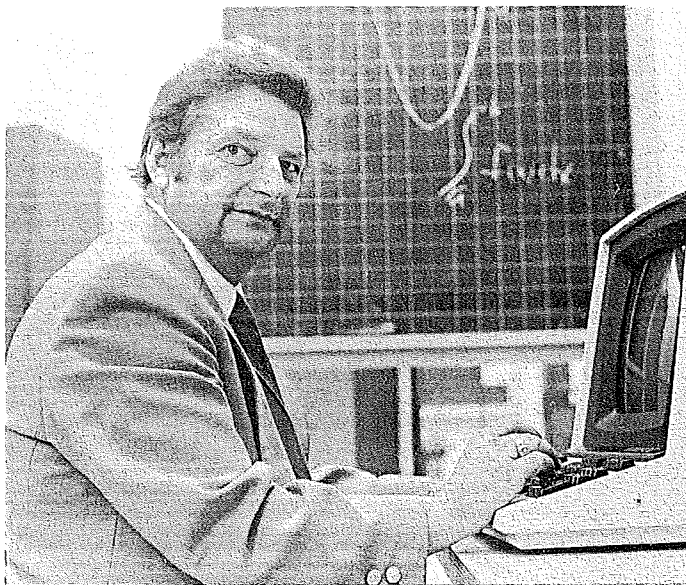

Maki explained that with an applied math major, a student can go on to earn higher degrees in many of the subjects included in the major, such as math, business, statistics, or computer science.

Because of their diversity and flexibility, applied math majors are able to "roll with the punches," Maki said. That is, they adapt well to change and are more usable and adaptable to various jobs. They can also communicate with people who have chosen to pursue one special course of study, such as accounting.

"Employers that come to Stout appreciate this adaptability," Maki said, explaining that often a broad, general knowledge in a variety of related areas helps, because frequently the first year or two in a company is a learning time anyway. It is the foundational knowledge that is necessary.

Many students in applied math also get the benefit of a six-month internship with a company, and the school continues to look for more companies interested in such internships. Internships, Maki said, make the students more conversant with the business world and give them more self-confidence. Interns come back to classes with presentations on what they did, what they learned and practical suggestions.

The applied math major also offers a speakers series in which alumni and people from various companies come to campus and speak to students on subjects such as how to prepare for an interview. Graduates often report on how their courses relate to their jobs. The university tries to get students ready for the job market in many ways, Maki noted. □

*"It is not
a traditional program"*
—Maki

He also said that the faculty in the department is close to the students, knowing not only their names, but also their personalities and capabilities. "We can steer them toward the most appropriate companies for their capabilities and to the internships best for them," he said.

In the past, Stout has been able to place nearly every applied math graduate in a job. Maki admits, however, that the economy has had some influence on that record in the past couple of years. Companies have a "wait and see" attitude he said, before hiring anyone else. Even experienced systems people have been let go. "There is a small pool of experienced people out there without jobs," Maki said, but with the rapid advances in the field, "that won't last long." □

Operating budget gets approved

An operating budget for Stout, totaling more than \$46.7 million, has been approved by the UW System Board of Regents. Funding is for the 1983-84 fiscal year, which covers July 1 through June 30, 1984.

Approximately half of the university's total operating budget is financed by state tax dollars; the remainder comes from fees, grants and gifts.

The budget has increases of tuition and fees, although Wisconsin residents attending Stout will experience total additional costs of less than 3 percent from last year.

The budget includes approximately \$27 million in salaries and fringe benefits for the university's 924 permanent employees and graduate assistants. By action of the State Legislature, no money has been provided for salary increases this year.

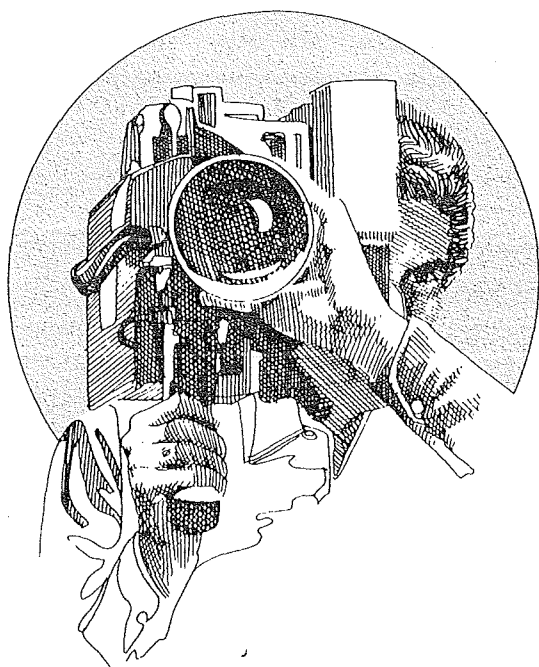

Other expenditure categories are \$11.9 million for supplies and services and \$3.7 million for equipment.

James Freer, university budget officer, said Wisconsin students attending Stout will pay \$2,891 for tuition, segregated fees, room and board for the year. Freer said this represents a \$77 increase or about 2.7 percent from last year.

Freer said the relatively modest increase is due to strong continuing enrollment at Stout and efficient management of areas such as the university's auxiliary operations, which include the Student Center, residence halls and food service. For example, room rates this year will increase \$22 and there will be no increase from last year in the food service rate.

"Auxiliary operations have been fully used because of our strong enrollment," he said. "By operating at full capacity, managers of the auxiliary operations have been able to hold down costs." In addition, he said, auxiliary services have been operating from a sound financial base, using good management techniques to keep costs in line.

Segregated fees, which cover things such as student activities, will be \$225, a \$5 increase from last year. Freer said that the solid student base and use of these funds administered by student government, have kept costs down. "Students have been realistic in their expenditures and, therefore, have not put a high demand on these segregated fee dollars," he said. □

Teleproduction Center

Hard work wins acclaim

by Lynn Meyer

Refreshing, responsible television shows of high quality that have the intention of "developing a higher level of intellectual, cultural and human sensitivity." That may not sound much like many of the television shows being produced today, but it does describe the kind of programming the Teleproduction Center at Stout is producing. And the Center has awards from the industry and education which reflect that kind of quality.

This TV production house, the Teleproduction Center, was conceived in 1975 as part of Stout to produce television shows for WHWC-TV, Channel 28, the public television channel in the area. There were five on the staff originally, and that is what the Center is funded for. But because of additional funds the Center has earned by securing numerous contracts for shows, the staff has increased to 13. That includes Paul Stankavich, director of the Center, along with producers, directors, writers, an art director, cinematographer/videographer and audio specialist. In addition to serving Channel 28, the Center now provides programs for the entire Wisconsin Public Television Network as well as various public agencies and organizations.

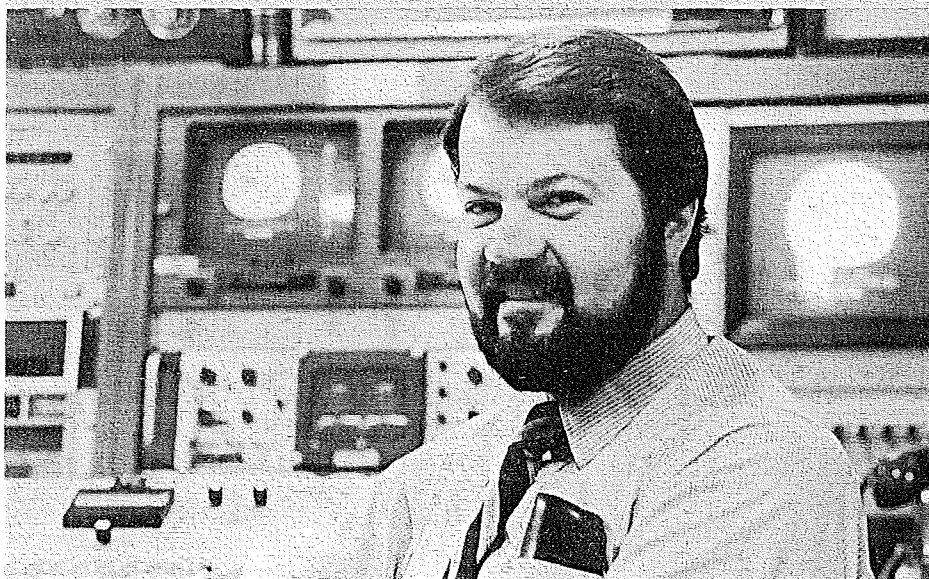

Instructional programming is an important part of the Center's work, according to Stankavich. Programs that cover everything from science to history to social skills

may be viewed within a school-room setting at elementary and secondary levels. The Department of Public Instruction determines the area in which an instructional program is needed, and the Center produces it. "We do not determine content," Stankavich explained, "that's handled by the experts in education." After being produced, programs are reviewed by the Educational Communication Board, the governing body of Wisconsin

Public Television. The Teleproduction Center, however, acquires the talent and writes the script. "And the bottom line is, if young people learn," Stankavich said.

With other kinds of programs, the Center develops ideas themselves. They "initiate, investigate, produce and deliver programs on many topics. Spectrum 28 is an example. It offers material of interest to people in the 19-county Channel 28 viewing area.

"There's no magic formula. It takes time and effort and commitment"
—Stankavich

The Center also produces everything from 30-second public service announcements to 30-minute instructional programs.

Public affairs programs include consumer programs on topics such as fuel conservation and energy alternatives; social issue programs on child abuse, alcoholism, learning disabilities; entertainment programs such as bluegrass groups, puppetry, drama, poetry; instructional programs on bike safety, math enrichment; and in-service programs on copyright law and peer counseling. One recent program was on computers. High school sports and "specials" are also offered. A show on Finnish co-ops in northern Wisconsin took more than a year to develop with all the research, videotaping and other work involved. Staff members at the Center develop a variety of programs to suit many different tastes. In fact, the Center is open to good ideas for programs, although funds are limited.

The Teleproduction Center has received wide recognition for its efforts.

When asked about the national and state awards the Center has won, Stankavich acknowledged that "yes, the Center has won some." He proceeded to produce from his files a four-page typed sheet which lists nearly 40 awards the Center has received: Corporation for Public Broadcasting awards, Central Educational Network awards, National Association of Educational Broadcasters, graphics and design awards, Broadcast Designers' Association awards, Gabriel awards for "uplifting" television. Most recent awards include the International Film and TV Festival of New York Bronze Award and the San Francisco State University Broadcast Industry Conference award.

How, Stankavich was asked, are award-winning shows produced with the limited available funds. "There's no magic formula," Stankavich said. "It takes time and effort and commitment. It's simply a commitment to quality...If it were just a job, it wouldn't work, but it's more than that." □

Sports recognition

Frank Belisle

A veteran timekeeper and avid Blue Devil fan, Frank Belisle received the Distinguished Athletic Service Award at the university's annual Hall of Fame ceremonies September 10.

Belisle was football and basketball timekeeper for Menomonie High School and Stout from 1942 to 1970. He was also a timekeeper for track. Belisle was honored by the university's "S" Club on his retirement in 1970.

Belisle taught biology at Menomonie High School from 1926 to 1955. He then served as registrar and director of Placement at Stout until his retirement. □

"S" Club

Formed last fall, Stout's National "S" Club is compiling names and addresses of former Stout letter winners.

Letter winners are requested to send their names and addresses to the club's secretary-treasurer Steve Terry, in care of the University of Wisconsin-Stout Fieldhouse, Menomonie, Wisconsin, 54751.

Besides his "S" Club responsibilities, Terry is head track coach and offensive coordinator for the football squad. □

Faculty promotions announced

Promotions in rank, tenure and emeritus for Stout faculty have been announced by Chancellor Robert S. Swanson.

Promoted from associate professor to professor are Nasser Hadidi, mathematics; Fred Menz, Research and Training Center; Tom Modahl, vocational rehabilitation; Wayne Nero, business; and Gerald Zimmerman, chemistry.

Faculty members promoted from assistant to associate professor are Jafar Jafari, habitational resources; Patrick Liebergen, music; Janet Polansky, English; Denise Skinner, human development, family living and community educational services; and Zenon Smolarek, industrial management.

Moving from instructor to assistant professor are Mary Hopkins-Best, educational psychology; Stuart Fullarton, habitational resources; Phil Sawin, Library Learning Center; Ron Verdon, art; and Ned Weckmueller, industrial management.

Hadidi, Menz, Verdon and Weckmueller were also granted

tenure. In addition, tenure was granted to 10 other faculty members: Gary Searle, industrial and marketing education; Howard Feldman, vocational rehabilitation; Leonard Sterry, graphic communications; Claudia Smith, art; Carole Flint, English; Raymond Hayes, speech; Maureen Munger, business; James Pejisa, physics; and Priscilla Kesting and John Williams, human development, family living and community educational services.

Jane Rosenthal Reynolds, human development, family living and community educational services, was named professor emeritus. She is retiring after 21 years of service to Stout.

Edward Gold, chemistry, who is retiring after 16 years at the university, was named associate professor emeritus.

The emeritus designation is an honor granted to retired faculty members. It is awarded, along with faculty promotions, as part of the annual operating budget. □

Energy CONSERVATION

Stout a leader

Stout continues to be a leader in energy conservation in the UW System, according to a report issued to System administration.

The report, which covers the 1982-83 fiscal year, shows that total energy consumption dropped 4.9 percent from the previous year.

In the report, Dan Newhall, Stout's physical plant director, attributed part of the reduction in consumption to the university's computerized management system, which monitors energy controls.

"One of the primary reasons for Stout's continued energy consumption reduction each year is the attention given to systems maintenance, especially in the area of mechanical controls," Newhall said in the report. "Another reason is the importance given to equipment running times to take advantage of electric utility off-peak hours when applicable."

But Newhall also said that campus community attitudes about conservation and completed conservation projects have also contributed strongly in maintaining Stout's position as one of the lowest energy users in the UW System. □

Sundial restored

In a symbolic move to conserve energy, the university's sundial has been restored to operate.

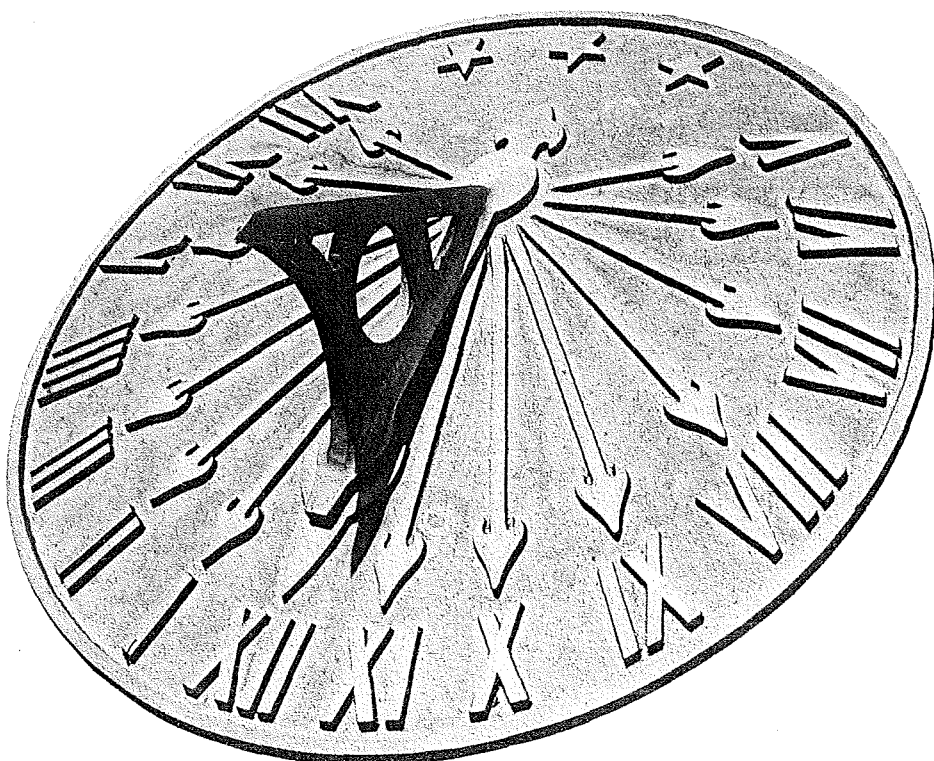

Located at the rear of the present student center, the sundial had been vandalized and was not operable for about 20 years.

Members of the Inter Residence Hall Council energy committee voted to spend some of their funds to have the repairs made. Their action was intended to symbolize the value of having something which performs a function without using

energy. The committee has been active in promoting various energy conservation steps that have been taken in the residence halls.

Repair work on the sundial was done with parts cast in the Stout foundry under the supervision of Paul Speidel, associate professor of materials processes.

The sundial was a gift to the university from the 1956 graduating class. Its base is inscribed with the motto "Out of School's Life Into Life's School." □

SPECIALIZATIONS

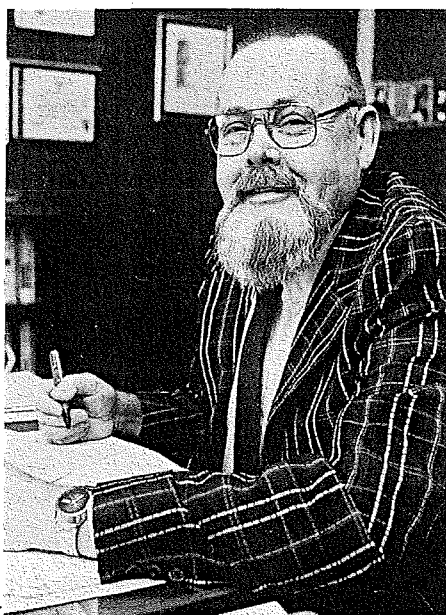

a new approach

A new approach to education is being launched at Stout in the form of what the university calls "specializations," according to Vice Chancellor Wesley Face.

Face said these "specializations" will permit studies in new areas "in a different way than through traditional majors, minors, concentrations and credit requirements."

Four "specializations" will be offered initially by the university:

- **Inventing.** This will enable students with creative abilities to study ways of improving productivity and solving social problems through the use of the most recent advances in technology and to advance their inventive capabilities.
- **Craftsmanship.** Students with this specialization will be assisted in learning about subjects such as skill development, materials, tools and aesthetically pleasing design as a means to further develop their ability in a select craft area.
- **Training and Resource Development.** This "specialization" is designed to prepare graduates who will be able to design training programs. The program will be of particular interest to students who have a background in areas such as engineering, technology, education, business and labor.
- **Future studies.** This program will focus on techniques of predicting and managing changes which will affect various aspects of society. The "specialization" will be of interest to those students interested in long-range planning.

*"Each specialization
will be unique
in its approach..."*
—Face

Nelva Runnalls, Stout's dean for curriculum, research and graduate studies, said the "specializations" will provide a way of implementing a portion of the university's mission statement which calls for "development of new educational strategies."

Runnalls described the "specializations" as "quite different from the curriculum we usually have."

Face said that although these programs may attract new students to Stout, enrollment is expected to

draw mainly from students already enrolled who will use the "specializations" to enhance their existing course work. In some cases, courses taken for a "specialization" may be applied to a Stout degree program, although that will not be a requirement, Face said.

Face and Runnalls said the programs will be "transdisciplinary," meaning they will cut across departments and schools throughout the university. Face said a faculty adviser will be appointed for each "specialization." Through the adviser, students will be assisted in designing specific objectives within the "specialization." Face said in most cases this will involve a variety of learning experiences including both credit and noncredit activities. "Each 'specialization' will be unique in its approach to developing the desired capabilities and will be individualized for the student," Face said.

Face said he views this new approach to education as "the opportunity to do some fairly creative things without worrying about some of the traditional requirements." Runnalls added that it is also intended to "accomplish objectives without the specific prerequisites" normally found in many programs at the university. □

Norwegian/-Stout EXCHANGE PROGRAM

Irene Borge and Karen Langballe

There was a Norwegian touch this summer to the food prepared at Corner III, the instructional restaurant facility in Stout's home economics building. Irene Borge was the first Norwegian food apprentice to attend summer school in the Hotel & Restaurant area.

Irene works at the Annen Etage, a French restaurant in the Hotel Continental, Oslo, Norway. It is the only five-star restaurant in Norway. Irene was awarded the trip and course work at Stout for the best apprentice performance at the hotel. She was enrolled in two classes this summer: Quantity Food Production and Restaurant Operations Management. She noted that both classes provided her with much experience specifically in the areas of greeting and waiting on guests and working with the different forms of food service.

She said that in the United States more carbohydrates are served, deep-fat frying food is more popular, and larger portions of food are served. As evidence of all three, Irene said she had gained ten pounds. In Norway simpler preparations are used such as boiling or poaching food and, of course, fish is served very often.

Irene is originally from Voss, Norway. She began working as a dishwasher at the Stalheim Hotel at fifteen. She was interested in food preparation, and was "kidnapped" by the cook to work in the cold kitchen preparing appetizers, salads, and desserts. She attended the Flksand Husmorskole in Bergen in order to apprentice as a chef. She will continue her apprenticeship once she returns to Norway and will receive her diploma as a licensed chef in December of this year.

Asked what she enjoyed during her eight-week stay in Menomonie, Borge said she liked the fourth of July fireworks, shopping, tubing down the Red Cedar River, the campus that was easy to get around and the Mabel Tainter Theatre. The hot weather was also enjoyable but not the tornadoes. "There's no such thing in Norway."

She appreciated the aid of her instructors with the subject matter and for the first few weeks with the English language. Cheryl Bork, Philip McGuirk and teaching assistant, Karen Langballe, who is also from Oslo, made summer school an excellent learning experience. "Everyone is so friendly and helpful," and Irene was amazed at the helpfulness of students in her class. Socializing outside of the classroom with students was new to her; in Norway everyone is off to work after classes.

"Thanks to the university and the community for supporting the exchange program. I know this program will be a great opportunity for participating students. I've had a great time here. I hope to return to Menomonie some time in the future."

John Repa, a senior from Cudahy, is the Stout student who is working at the Hotel Continental this summer for eight weeks. He will obtain three credits for the experience. Next summer three hotels in Norway will participate in the program and each will exchange two apprentices with two UW-Stout students. Teaching assistant Karen Langballe has also been instrumental in this. □

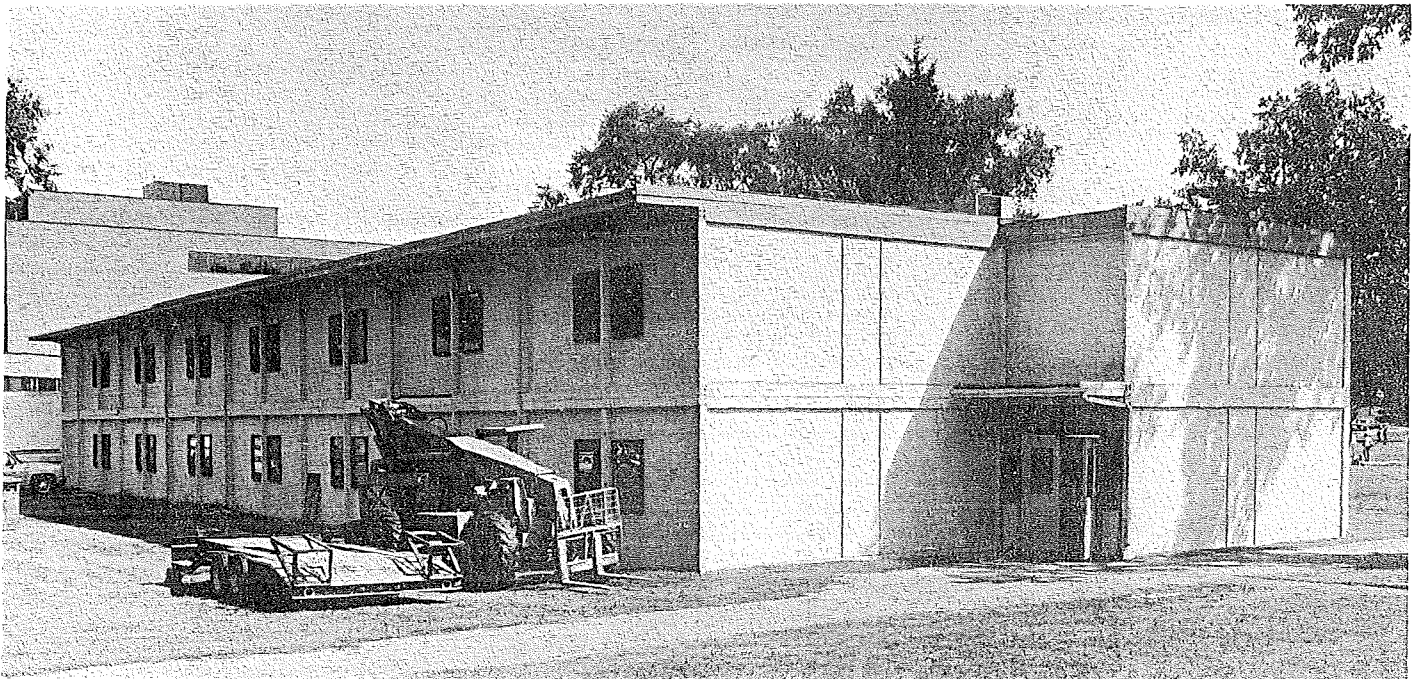

Farewell to the Modulux

The Modulux. For nearly a decade and a half it served as a temporary classroom and office facility while Stout underwent a burgeoning growth in enrollment and building programs.

Now, with enrollments stabilized and the campus building program nearly complete, this tenuous landmark will be removed. A portion of the university's new student center will occupy the site with completion expected in 1985.

A prefabricated building, the modulux was assembled in its present location during January of 1969. At the time it provided relief to a critical space shortage and over the years has been a place where many a faculty member has set up office. Scarcely a single graduate at Stout in the last fifteen years has not had at least some classes in the modulux.

During its occupancy, seven new classroom and office buildings were erected on campus and several more existing facilities were remodeled. Renting the modulux from private owners allowed smooth transition to the new facilities. Now, workers are disassembling it and moving it out of Menomonie. □

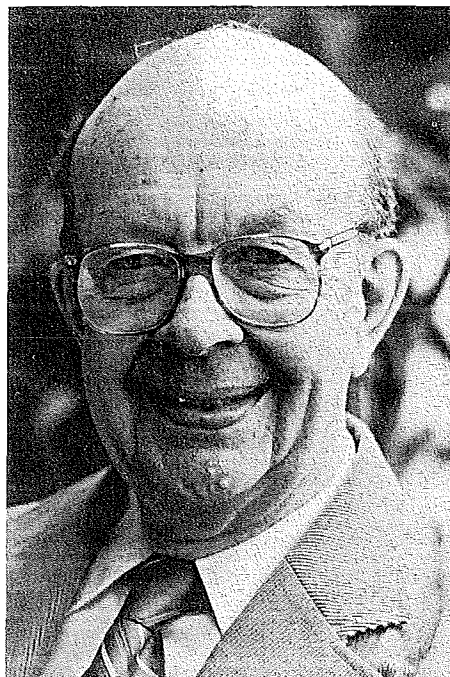

Class Notes

1925-1952

Helen Diamond Wicher '25 resides in Harlingen, Texas and spends her summers traveling. **Kathaleen Hughes Ranum** '25 resides at Pineview Apartments, Carlton, Minn. **Vivian Florin Hazel**, BS '33, MS '58, was honored at Hope United Church of Christ, Cochrane, in appreciation of her years of service in the missionary field. **Helen Owen Bittwer** '34 has retired from teaching home economics at West Ottawa Middle School, Holland, Mich. **Stuart Anderson** '35, a former Stout faculty member, has retired from Sangamon State University, Springfield, Ill. He has authored a book for Illinois Association of School Boards titled "Successful School Board Meetings." The IASB has also published a 72-page national edition of this book for distribution in the 50 states. **Lester "Buck" Reynolds** '39 has retired after 28 years of teaching auto mechanics and five years with General Motors. He is married to **Jane Chenoweth Rosenthal Reynolds** BS '40, MS '60, who has retired from Stout as assistant to the Chancellor for affirmative action and professor in home economics education. They are residing in Menomonie. **Eugene Wereley** BS '42, MS '47, resides in New Berlin after retiring from 34 years with the Milwaukee Public Schools. **Ruth Madison Harmon** '45 has retired from the Muskegan Heights Public Schools after 38 years. **Joe** BS '47, MS '53 and **Dora Campbell Serflek** '45 reside in West Allis, where he has retired after 36 years of teaching in the West Allis School District. **Bernard Hughes** '48 has been elected president of the Wisconsin School Public Relations Association. **Robert Christianson** '50 is a radar technician for the Federal Aviation Administration, and resides in Palacios, Texas, with his wife and son. **Mildred Halvorson** BS '51, MS '61, is in sales with Realty World-Colonial Square, Menomonie. **Russ** '51 and **Jean Van Liew Boettner** '52 reside in Wyandotte, Mich., where he is retired from teaching industrial arts at Flint and Ecorse, Mich. **Walter Parsek** BS '52, MS '57, has retired from teaching at Menomonee (Michigan) High School. He was a machine shop teacher there for 31 years. **Roland Krogstad** MS '52, is a state vocational school board research consultant and has been involved in many community volunteer programs.

1955-1969

John Rynders BS '55, MS '62 has been awarded a Fulbright Scholarship to Israel where he will be teaching educational psychology courses with emphasis on special education at Bar Ilan University in Ramat Gan. He will be doing research with professor Reuven Feuerstein on mental retardation and co-authoring a book with him. Rynder's wife **Barbara Brown Rynders** '57 and daughter will be living in Jerusalem with him for the nine months. **Harlan Giese** '57 has been executive director of the Iowa State Advisory Council on Vocational Education since 1970 and was recently elected vice chair of the National Association of Ex-

Stuart Anderson '35

ecutive Directors of State Advisory Councils on Vocational Education in Washington D.C. He resides in Urbandale, Iowa. **Duane** '59 and **Gwen Somers Marshall** '57 are teachers at Torch Middle School, LaPuente, Calif. He also does remodeling and she sells hand-made arts and crafts. **Jack Kirby** MS '58 is the industrial education department chairman at UW-Platteville. He was recently awarded a Laureate Citation by the board of directors of Epsilon Pi Tau, the international honorary professional fraternity of education in technology. **James Cain** '59 is program administrator for IBM and resides in Dunwoody, Georgia. **Gerald Korpela** '60 has been appointed manager of engineering with FWD Corporation. **James Lubahn** '60 is manager of manufacturing engineering for Doerr Electric Corp. in Cedarburg. **John Banks** BS '61, MS '68, ED.S. '73 is the secondary vocational education coordinator with the Rochester, Minn. School System. **Gerald Sorensen** '61 has been named principal of Central High School, Salem. **Martin Blonde** '62 is teaching metals at Hamilton High School in Sussex and resides in North Lake. **Donna Reiter Cordes** BS '64, MS '81 is an outpatient counselor for the Lutheran Social Services office of Rice Lake. **Joyce Ziegler Freiwald** '65 is a department chairperson and assistant professor of fashion merchandising at Northwood Institute, Midland, Mich. She was awarded the 1982-83 Northwood Institute Faculty Excellence Award. Freiwald resides in Saginaw, Mich., with her husband and three children. **Dennis Herling** '66 is general supervisor, Detroit Diesel Allison Division, G.M. Corp. He resides in Indianapolis with his wife and two children. **Nicholas Verstegen** '68 is employed by the University of Minnesota in Agadir, Morocco, where he resides with his wife. **Dale Lueck** '69 is manager of manufacturing operations at Rockwell International, Collins Avionics Group, and resides in Center Point, Iowa.

1970-1972

Norman and Barbara Opalinski Paradise '70 have adopted a son, Alexander, age 3, from El Salvador. **Maria Novasic Ritter** '70 is dietary supervisor at Hill Haven's Sierra Vista Care Center, Sierra Vista, Ariz. **Edgar Ryun** BS '67, ME '70 is administrator of the Fennimore Community School System. He resides in Fennimore with his wife **Linda Schultze Ryun** '73 and their three children. **Brent Surowie** '70 is an account manager for Proctor and Gamble Distributing Co. in Maine and northern New Hampshire. He resides in Wayne, Maine with his wife and three children. First Lt., **Jane Bjerke** '71 is an aircraft maintenance officer with the 10th Aircraft Generation Squadron and has been decorated with the U.S. Air Force Commendation Medal at RAF Alconbury, England. **Larry Schnepf** '71 is a cafeteria manager for Service Systems of Buffalo, N.Y., and resides in Niagara Falls, N.Y., with his wife and three children. **Richard Valenta** '71 is a new product design engineer at Hamilton Industries in Two Rivers. **Chuck Weydt** '71 is a counselor with Northeast Wisconsin Technical Institute, Sturgeon Bay. **Richard** '72 and **Karen Skjegstad Bauer** '73 have adopted a baby girl, Elizabeth Anne. They reside in Madison. **Kathleen Myhra Olson** '72 is secretary of the Minnesota Association of Extension Agents. **Bill Schaller** '72 is assistant training instructor of equipment and plant department for Milwaukee County Transit System.

1973-1975

Bill Eno '73 is director of food and beverage at Des Moines (Iowa) Marriott. **Kay Schneider Fett** '73 is director of marketing and training at Security First National Bank, Sheboygan. She resides in New Holstein with her husband **Mike** '72 and two children. **Susan Thompson Hunter** '73 is a cost accountant for St. Jude Medical Inc., St. Paul, Minn. **Barney Klecker** BS '73, MS '76 is the world-record holder (4:51:25) for the 50-mile ultramarathon. **David Miller** '73 is president of Miller Manufacturing Inc., New Holstein. He recently received a service award for the work he has done this past year as program chairman for the Society of Manufacturing Engineers. **Evelyn Chritton** '74 has been promoted to assistant secretary at Title Insurance Company of Minnesota and is supervisor of final policy production. She resides with her husband in Champlin, Minn. **Jeff Gove** '74 is employed by Bethesda Hospital Association, Cincinnati, as food service director. **Donna Jensen Menart** '74 has received the 1983 Distinguished Service Award by the Wisconsin Association of Extension 4-H Youth Agents. **Dave Daubner** '75 is employed as a cook at Al Johnson's in Door County. **David** '75 and **Candice Matson Polka** '77 reside in Saukville. He is working at Allen Bradley Co., Cedarburg, in technical writing and marketing communications. She is in advertising and marketing for Country Quilts/Sampler Wholesale, Cedarburg. **Nancy Luedtke Ziemann** '75 has a 30-minute cable television show "Sewing with Nancy," filmed in Milwaukee, which airs in 46 states, Puerto Rico and Guam.

1976-1977

Glenn Baird '76 is food and beverage director of Castle Kitchens Corp., at the Minnesota Renaissance Festival, Shakopee, Minn. Michael Guckenberger BS '74, MS '76 is administrator at Nicolet College Vocational Evaluation Center in Rhinelander. Betty Cheadle Hartman '76 is a consultant for Discovery Toys. Brett Huske '76 is director of sales of the Sheraton Molokai Hotel at Kalua Koi Resort, Honolulu. Steve Nechvatal '76 is food and beverage manager at Paper Valley Hotel and Conference Center in Appleton. Dave Nolan '76 is director of marketing for Boston Marriott Hotel, Newton, Mass. Dave and wife Christine Redlich Nolan '76 reside at 800 Haverton Drive, Creve Coeur, Mo. David Pollack '76 is employed as tax attorney, tax department, Arthur Andersen Co., Chicago. Jim Schultenover '76 was named Outstanding Director of Sales for Marriott Hotels for 1982 for exceeding his booking pace by 90 percent and for developing new methods for establishing business leads. The Chicago Marriott competed against the company's other 119 hotels for the award. David Willard '76 is senior associate engineer, general technology division of IBM in Burlington, Vt. Mary Zelenka '76 is teaching home economics to handicapped students at Gaenslen School in Milwaukee. Larry Huber '77 has been appointed chief of the city of Fitchburg Fire Department. David Koster '77 is general manager of Thermo Burr in Madison Heights, Mich. Sharon Nelsen '77 is a home economics teacher at Cameron High School, and a summer travel recruiter and counselor with the American Institute for Foreign Study and American International Travel-Study Programs. Peggy Traeder '77 is the owner and manager of Lady Luv, Reedsburg's newest women's fashion shop.

1978

Marriages

1940-1978

Jane Chenoweth Rosenthal BS '40, MS '60 to Lester "Buck" Reynolds '39, March 12, Menomonie, where couple resides. Janet Genett to Ronald Hull '66, Jan. 3, Marshfield. Couple resides in Houston. Marjorie Fisher to Nicholas Verstegen '68, Dec. 18, St. Paul. Couple resides in Agadir, Morocco. Julie Olson to N. Joe Hertzfeld '69, Jan 30, Monroe. Couple resides in Eau Claire. Susan Gennigen to Steve Zelinske '73, April 9, Menasha. Susann Thompson '73 to Steven Hunter, Sept. 24. Couple resides in Shoreview, Minn. Karen Hodnett '74 to Wayne Martin, Jan. 4, Iolani Palace Park, Honolulu, Hawaii. Couple resides in Monroe. Amy Kranski to Richard Burdick BS '74, MS '76, April 2. Margaret Alf to Glenn Kindshi '75, Janesville. Mary Hastreiter '76 to Gary Smith, May 27. Couple resides in Bellingham, Wash. Mary Harmon '77 to William Howe, Dec. 12, aboard the Harvey Gamage schooner. Couple resides in St. Thomas, Virgin Islands. Pamela Simonds '77 to Stephan Andersen, May 7, Baraboo. Couple resides in Madison. Sharon Berndt to Donald Tinjum '78, April 9, Wausau, where couple resides. Beth Carlson '78 to Robert Unbehaun, March 19, Chetek. Couple resides in Los Angeles. Karen Jensen to George Troupis '78, March 26, Lake

Geneva, where couple resides. Barbara Lundeman '78 to David Ulma '79. Couple resides in Dayton, Ohio. Susan McNamara to Richard Reinikainen '78, June 4, Buffalo, N.Y. Couple resides in Kenmore, N.Y. Kathleen Schmidt to Michael Sheehy '78, May 14, Kaukauna. Mary Schrader '78 to William Bairam, April 9, St. Petersburg, Fla., where couple resides. Marjorie Schafer '78 to Samuel Muscarella, May 21, Milwaukee. Couple resides in Southfield, Mich. Jean Valentincic to Randall Miller '78, June 4, Sheboygan. Couple resides in Plymouth.

1979-1980

Sherry Anderson '79 to Steven Norris, Jan. 23, Sparta. Couple resides in Winona, Minn. Debra MacDonald to Robert Baugniet '79, July 2, Sheboygan, where couple resides. Kathy Dillingham '79 to Kerry Morgan, June 11. Couple resides in Clintonville. Christine Dreyer '79 to Robert Rugg, Oct. 2, Cedarburg. Couple resides in Lenexa, Kan. Mary Ebbesen '79 to James Davis, Feb. 4, Wheaton, Ill. Couple resides in Glendale Heights, Ill. Celene Frey '79 to Roy Ostenso, April 23. Couple resides in Menomonie. Julie Gessert '79 to Jan Prinsen '80, March 6, Cedar Grove. Couple resides in Crestwood, Ill. Leslie Hankey '79 to Michael Dugas '82, Aug. 1982, Appleton. Couple resides in Santa Clara, Calif. Susan Hub '79 to Peter Batchelor, April 21, Spring, Texas; where couple resides. Patricia Mannel '79 to Douglas Dorow, Jan. 30, Barrington, Ill. Holly Ostoic '79 to David Johnson, April 16, Beloit. Couple resides in Appleton. Kathy Olson to John Ostrowski BS '79, MS '80, May 21, Wittenberg. Couple resides in Roseville, Minn. Linda Poppelaars '79 to John Heurung, April 7, Minneapolis. Couple resides in St. Louis Park, Minn. Margaret Schmidt to Robert Noll '79, April 16, Kaukauna. Jenifer Smith to David Knoff '79, April 9, Muskego. Couple resides in Milwaukee. Julie Hass '80 to Benjamin Hensley, March 12, Lincoln City, Ore. Couple resides in Gleneden Beach, Ore. Ann Herder '80 to Jeff Voermans, May 21, Wausau. Couple resides in Green Bay. Lorie Maidl BS '80, MS '81 to Jeffrey Bunke '82. Couple resides in Milwaukee. Emily Miller to Jack Kobinsky '80, June 4, Edina, Minn.

1981

Karen Cederstrom to Fran Netteberg '80, August 1982. Couple resides in St. Paul, Minn. Karen Cleppe to Ken Woelfel, June 5. Couple resides in Muskego. Cheryl Conto to Anthony Rizzio, March 5, Addison, Ill., where couple resides. Margaret Fena to Bill Coldwell, May 7, Hibbing, Minn. Couple resides in San Jose, Calif. Margaret Frigo to David Longstreet, March 13, College Station, Texas. Couple resides in Houston. Paulette Hidani to Timothy Hein '80, April 2. Couple resides in Crystal, Minn. Kathryn Knuteson MS to Warren Wesley BS '76, MS '81, May 7, Seneca Corners. Couple resides in Columbia Heights, Minn. Ann Petershack to David Juhlke '82, April 16, Elm Grove. Couple resides in Ottumwa, Iowa. Jill Peterson to Trent Zimmerman, May 7, Okauchee. Couple resides in Oconomowoc.

1982

Kathy Atkinson to Randy Birr, April 8. Couple resides in Tucson, Ariz. Mary Bord to Kirk Gillette, June 11, Wisconsin Rapids, where couple resides. Katrina Roth to Boyd Wissbroecker, June 4, Antigo. Couple resides in Pearson. Katy Golden to Scott Richter, April 30. Couple resides in Cedar Rapids, Iowa. Jody Kettler MS, to William Peplinski. Couple resides in Monona. Jerilyn Kinkema to Edward Ludwig, Dec. 4. Couple resides in Rockford, Ill. Karla Kleckner to Jeffrey Bergman '81, Cleveland. Couple resides in Racine. Margaret Larkin to Dale Neis, April 9, Lancaster. Couple resides in Dickeyville. Mary Lenbom to Kevin Carlson, May 14, Chetek. Couple resides in Fort Worth, Texas. Gretchen Mayer to Michael Morgan '81, April 23, Watertown, Minn. Couple resides in St. Louis Park, Minn. Cindy Nault to Rick Kornely, April 9. Couple resides in Port Washington. A daughter, Keara Lynn, Feb. 21, to Joe and Betzi Knecht Murphy '76, Denver. A

People You Know

The Alumni Association has continued to initiate chapters around the country. Dave Williams, director of the Stout University Foundation, visited the Dubuque area alumni picnic on Saturday, June 25. The picnic was sponsored by the Tri-State Alumni Chapter. Three couples worked diligently on the first chapter activity: Mike '74 and Margaret Goedjen Lenth '75, Harlan '67 and Dianne Dregne Pedretti '69, and Steve '72 and Faye Lumsden Scheil '72.

A picnic at Lake Harriet Gazebo in Minneapolis was the second chapter activity for the Twin Cities Stout Alumni. Prizes were awarded for various categories: most impressive job title, Myles Ophem '80, "Empirical Machinery Design;" earliest graduate/most grandchildren, Mimi Wedel '21; hometown farthest from Minneapolis/St. Paul, Ian Robinson BA '72, MS '75; most distinguished receding hairline, Norm Olson, Dip. '29, BS '30; couple most recently married, Deb Ebert '80 and Tim Gangnon; and most recent graduates, Jean Ellingson '82, and Kris Fryetel '82.

Terry and Margy Wood Ingram BS '70, MS '76 from the Stout staff, hosted an alumni gathering at the Normandy Inn, Port au Spain, Trinidad, in May. The alumni chapter committee includes Amos Brown '80, Hugh Gaskin BS '73, MS '74, Esther Godfry Springer BS '78, MS '79, Selwyn Jarvis BS '80, MS '81, Peter O'Neil BS '80, MS '81 and Zena Whitshire '80. Prizes were awarded for the following: youngest child, Peter BS '80, MS '81 and Cheryl Toussaint O'Neil '80; earliest graduate of Stout, Ronald Maunday BS '66, MS '67; youngest graduate, Joel Trim '82; and birthday, Bernadette Joseph BS '81, MS '82.

The Detroit area alumni met at the Plymouth Hilton on June 18. Dave Williams presented a program on the Stout University Foundation. Awards went to Laurie Rentz '82 as the youngest graduate; Spencer Wright '33 as the earliest graduate; Les Haight '78 farthest from home; Ole Olsen '40 birthday; and Jim and Eleanor Keppen Warren '41 for the youngest grandchild. If you are in the Detroit area and are interested in giving the steering committee help, please get in touch with any of the following: Bill Barth '65, Les Haight '68, Bill Jusela BS '63, MS '68, Harlan "Ole" Olsen '40, John Pagels '63 or Laurie Rentz '82.

More than 60 alumni and friends of the class of 1923 and 1933 attended the university for the golden anniversary reunion, June 17. The class toured the campus and the city, enjoyed a special luncheon in their honor, and heard Chancellor Robert Swanson. Chancellor Swanson gave them a view of Stout and its mission into the 21st Century.

Vice Chancellor Wesley Face and Dean Anthony J. Samenfink welcomed home economists attending the American Home Economics Association Convention in Milwaukee at a Stout alumni reception. Bob Briese '80, manager of the Wisconsin Club did an outstanding job helping the office plan the June reception for 195 alumni and friends.

Chancellor and Penny Swanson; Ann Ramage, assistant director of residence halls; Judy Spain, director of residence halls; and Pat Reisinger, alumni director, joined 58 Stout friends and alumni at a champagne brunch and harbor tour in Seattle, July 16. Don Feyereisen '60 was instrumental in initiating the Washington State Alumni Chapter. The alumni association recognized several alumni in attendance: youngest graduate, Marty Sandin Olson '79, earliest graduates, Herb Larsen BA '23, BS '40 and Dorothy Kraabel Lathrop '23; farthest from home, Herb Larsen; youngest child, Patti Kress '73; and birthday, Tom Olson. The chapter co-chairmen are Don Feyereisen '60, Gary '68, '70 and Barbara Langdon Sivertsen '70 and Charles BS '55, MS '56 and Evelyn Vlcek.

At the Marriott Hotel in Portland, July 17, the Chancellor's program was preceded by a Sunday buffet. Marcelle Bollum Straatman '43, the 1982 Distinguished Alumni Awardee, was recognized as the earliest graduate in attendance; Jo Ann Hayes Page, '80, was the youngest graduate; and Fred BS '63, MS '65 and Pat Graham Seggelink '65, of Medford, Ore., received the award for farthest from home. Alumni chapter co-chairmen are Marcelle Straatman, Jean Johnson '50, Vern Reseland '50, and Teri Van Bladeren '72.

Chancellor Swanson and David Williams hosted the Colorado alumni program in Denver, July 20. Alumni and friends gathered at the Airport Hilton for a program on the university and foundation activities. The earliest graduate in attendance was Caroline Brick Goodspeed '31 and youngest graduate, John Bedsted '82. Co-chairmen of the Denver alumni chapter include Garrott Barich '37, Betsy Goulett Gomoll '79 and Mary Cordy Wedam '61.

The second annual Stout alumni golf tournament was held at the Tanglewood Golf Course on July 30. Golfers enjoyed 18 holes of golf, lots of prizes and a picnic in 98 degree weather. Tournament winners were Ernie Christianson '53, low gross and winner of the silver bowl; Bill Engstrom '72, second place; Bill Amthor BS '50, MS '55 third place; Joan Christianson was the best female golfer, and Marv Friebeal '50 had the longest drive. Closest to the pin and longest putt awards went to Ray Szymanski; shortest drive to Joan Christianson; longest drive for a female, Kris Amthor '80; highest and most honest score according to her husband, Jackie Moss Van Heirseele '72.

Sixty-eight alumni and friends watched the Milwaukee Brewers shut out the Toronto Blue Jays Saturday, Aug. 6 after a Stout alumni tailgate party. The party was organized by the Milwaukee chapter officers Mary Goplin Wilde '80, Randy '79 and Ruth Kremer

Pickering '80; Sue Bell '70 and Mark '77 and Terri Handlos. Pat Reisinger, alumni director was there to lend a helping hand and greet alumni.

Summer wouldn't be without seeing visiting alumni in the office. William '47, '49 and Helga Hosford, Missoula, Mont., were here to celebrate Bill's 40th high school class reunion. Paul Baily '40 of St. Louis, Mo., was here visiting relatives and friends and adding material to his geneology project. Bill Banks '52 from Stockton, Calif., was here to ask about the Bay Area alumni chapter. He is vice principal at Hamilton Middle School in Stockton. Jack '49 and Marjorie Postman from Steilacoom, Wash., and Bernie BS '49, MS '55 and Ruth Schroder Hazarian '51 were visiting relatives in the Midwest and warming up with the weather we provided. Arthur '34 and Lorraine Steinbring Schwartz '33 were in from Fredericksburg, Va. Debra Torgerson King '75 from Superior stopped to inquire about an alumni chapter in the Duluth-Superior area.

Henrietta "Hank" Braker Harris '29 of San Marcos, Texas, was in Menomonie to see her relatives. Hank was the first woman vice president of the SSA in 1928 and also a recipient of the Eichelberger scholarship—the only scholarship at that time. It paid for 25 percent of a year's education. Bida Braker, her mother, was well-known to Stout students for her home-cooked meals. Bida is 100+ years and resides at the American Lutheran Home, 915 Elm Ave., Menomonie. She loves to receive mail.

Last year the Alumnus noted Henry Hansen's Dip. '14 visit to campus. Another classmate of Henry's, Anne McCulloch Smiley Dip. '14 saw the article and wrote to him. This past April, the two got together to reminisce and renew their friendship at her home in Fort Dodge, Iowa. As noted by Henry's friends, Agnes and Don Campbell who wrote to us, "it just shows what a newsletter can do for those who receive it."

The Stout University Foundation sponsored an awards reception for scholarship winners, parents, and donors, Sunday, Aug. 21 in the Student Union. Lloyd Milavitz, foundation president and Chancellor Robert Swanson welcomed the group and presented the scholarships. The generosity of donors provided the Foundation with monies for 250 scholarships this year.

Aloha! Hawaii, 1984!

The Stout Alumni Association is offering a Hawaiian tour, March 10 to March 18. The tour package includes four nights at the new Hawaiian Regent in Honolulu and three nights at the Kona Surf on the big island of Hawaii. The price of the tour includes all transfers from airports to hotels, a briefing session about the islands, half-day city tour of Honolulu, dinner and show at the Polynesian Center, interisland flight and stop at the Volcano House on Hawaii. A travel escort will accompany the tour. If interested in more information, call the Alumni office (715) 232-1151, for the brochure. Travel companies have been reluctant to quote a price so far in advance, but \$1,200 per person from Minneapolis is it at this writing. Prices are subject to change. As a part of the tour, alumni gatherings are planned on both islands.

The Alumni Association will be holding events in many parts of the country. If you are in the area, please join us.

Minneapolis/St. Paul	Sept. 16
Washington D.C.	Oct. 3
Homecoming	Oct. 22
Atlanta	Oct. 24
Rhineland	Nov. 5
Green Bay	Nov. 6
